A Message

In the third year since the cessation of hostilities, it is reasonable to expect that the Holland bulb situation has returned to normal. Unfortunately, on account of unusual weather conditions, this is not the case, and there will be a genuine scarcity of fine bulbs again this year.

The coldest winter in over 200 years took a severe toll of many normally hardy varieties, and followed immediately by an unprecedented heat wave which forced the bulbs into early maturity, has created a situation that will make an anticipated easy season a difficult one.

We approach this bulb season with few qualms, however, for we have prepared for

our season well. The only hitch that might develop is the possibility of labor difficulties on the maritime and transportation fronts which so nearly raised havoc with the bulb business last year.

Because of these conditions there will be a lot of inferior bulbs and substituted varieties offered by unscrupulous and inexperienced dealers. Insure the success of your spring garden by ordering only from known, reliable sources so that your anticipated joy in the garden next spring may be assured.

We are very proud of our reputation for handling only the finest material from world-wide and domestic sources.

NOTES ON FORCING TULIPS

All Tulips in this book marked "f" are satisfactory for forcing.

Single and Double Early Tulips can be brought into bloom as early as February 1st. Triumphs about February 10th and the later forcing varieties about March 1st.

Tulips should be potted in rich soil no later than November 1st for best results. Bury them in a well-drained pit and cover with 12- to 18-inch loose leaves, straw, etc. A cold moist cellar or cave that does not go below 32 degrees is also very satisfactory. Allow 5 weeks before blooming date for bringing into house temperature. When growing, the bulbs require copious quantities of water, a night temperature of 50 to 55 degrees, and a day-time temperature of 70 degrees maximum.

Cultural Notes for Daffodils

New bulbs are rarely ready before late September. Plant as early as possible for best results, although late planting is satisfactory. In Northern climates a protective mulch is assurance against freezing although all varieties are hardy.

Plant bulbs so that tip is covered 3 to 4 inches. Use Bone Meal or Superphosphate, avoid all manures when planting, and top dress the plantings in early March with commercial fertilizer. For long stems water the beds copiously whenever possible.

For naturalizing effects plant bulbs irregularly. Cast the bulbs and plant in the position that they have fallen.

THE QUALITY OF OUR OREGON TRAIL MIXTURE
The quality of our Oregon Trail mixture for naturalizing cannot be compared with any naturalizing mixtures offered at lower prices or even equal prices. Our mixture is made up of full size bulbs that average in weight from 8 to 10 lbs. per 100 bulbs. We are acquainted with other mixtures that weigh as little as 2 or 3 lbs. per 100 bulbs. We consider our mixture the finest value in Narcissus ever offered.

Schling's All-Star Collection
We have assembled this collection realizing that many gardeners prefer named varieties for naturalizing and mass effects and have purchased mixtures mainly because of the normal high cost of separate varieties. Each variety in this collection will be packed separately and is thereby distinguished from a mixture.
THESE VARIETIES AS LISTED WILL BE SOLD AS A COLLECTION ONLY. PLEASE DO NOT ASK FOR SUBSTITUTES OR DUPLICATIONS OF A VARIETY.
Remember that they are smaller size bulbs than our regular offerings, but they are guaranteed fine blooming size.

A comparative newcomer but deserving of the highest honors. Lovely impressive spikes of bloom that are easily forced in the home. Should be grown in a cool, bright location, and if planted before October 10th will bloom easily for Christmas.

Aurea. Lovely rich yellow spikes. (New.) 3 for \$1.00; \$3.00 per doz.; \$22.50 per 100.

Leucocoryne

(Glory-of-the-Sun)

Plant September to February.

Gorgeous, fragrant blue flowers on graceful wiry stems. Cut flowers last ten days to two weeks. The CHOICE bulbs we offer will give 100 per cent bloom. Same culture as Freesias. Jumbo bulbs, \$1.75 per doz.; \$13.00 per 100.

Narcissus

(Polyantha)

Plant October to January.

Paper-White Grandiflora. These ever-popular fool-proof house forcing bulbs seem to increase in demand. It is increasingly difficult to get good true bulbs of this lovely variety. Suffice it to say we attempt at all times to get the best, but WE DO NOT GUARANTEE THE FLOWERING RESULTS of these bulbs. Florida Grown Hand-Selected Bulbs: \$1.50 per doz.; \$11.00 per 100. **Grand Soleil d'Or.** California grown. A beautiful selected strain. \$2.00 per doz.; \$15.00 per 100.

Ornithogalum

(Star of Bethlehem)

Plant October to January.

Arabicum. A beautiful and impressive easy-to-grow bloom. Huge clusters of pure white, star-shaped flowers with black "shoe button" eyes on strong, graceful stems. Increasing in popularity. \$2.00 per doz.; \$15.00 per 100.

Oxalis

Plant September to February.

Bowiei. Easily grown in the home. The lovely foliage resembles perfect giant four-leaf Clovers, and flowers are a delicate pink.

Bermuda Buttercup. Rich golden yellow.

Grand Duchess Lavender. Same as above. Clear lavender flowers.

Grand Duchess Pink. Rich pink.

65c per doz.; \$4.25 per 100.

Ranunculus

Plant October to January.

Beautiful for forcing or for outdoor planting. They are hardy as far north as Virginia, and with protection are hardy anywhere. For forcing they are best planted October 15th to December 1st.

100% DOUBLE EXHIBITION STRAIN

Giant Tecolote, Claremont and Palafior Hybrids Mixed. Jumbo exhibition bulbs only, \$1.35 per doz.; \$10.00 per 100.

Veltheimia

(Cape Lilies)

Plant September to November.

Viridifolia. One of the finest blooming house plants from a bulb. Tall, heavy spikes of brilliant bloom with beautiful foliage. Plant one in a 5-inch pot. 85c each; \$9.50 per doz.

SCHLING'S Famous Lily-of-the-Valley Pips for Indoor Forcing

READ THIS PLAN CAREFULLY

There is nothing in the line of indoor forcing bulbs that can give the all-around satisfaction that one derives from our forcing Valley. Deprived of these since 1941 the American public demonstrated their love for this flower by the overwhelming demand we encountered when offering them for the first time last winter. Reports have been enthusiastic.

Ready for delivery September 15th—April 1st.

All pips delivered from September to December 1st will force readily in from 18 to 21 days. These are storage pips held over from last year. If you want a bowl of your own grown flowers on the THANKSGIVING or CHRISTMAS table, place your order sufficiently in advance to insure delivery.

After December 1st we will ship freshly harvested pips that will take from 28 to 35 days to bring into bloom. This growing period narrows down to 21 to 25 days as the season progresses.

FALL SOWN LAWNS ARE BEST

Schling's "REPUTATION BUILDER" Grass Seed Mixture

In a great measure the reputation of a seed house depends upon the quality of the grass seed mixtures offered. Because it is an item that is almost universally purchased by anyone who has any ground whatever, and because there has been and is such a wide variance in the quality of the lawn mixtures offered, it becomes increasingly important to acquaint the purchaser of grass seed with the history behind a quality mixture.

A grass seed mixture may be offered under any brand name. However, regardless of the name, the basis of all good grass seed mixtures must necessarily be the same. The important feature of a good mixture is that it contains heavy, plump seeds from selected grass stocks that have been grown for the distinct purpose of seed production. Careful blending plays its part in the compounding of a high class grass seed mixture. We have prided ourselves upon the super-quality of our grass seed mixtures which have established a reputation in the past twenty-five years.

Compare These Formulae With Any Grass Seed Mixture Offered

When you buy Schling's Maxima Mixtures you buy all live grass seed made up of the finest, hardiest grasses.

Illahee Creeping Fescue is the newest and toughest form of fine grass seed known. Please note that we have included this fine new grass in both of our mixtures.

Schling's Maxima Special Lawn Mixture

Price: \$1.10 per lb.; 2 lbs. \$2.10; 5 lbs. \$5.00; 10 lbs. \$9.50;		
25 lbs. \$22.50; 100 lbs. \$87.50.		

Schling's Maxima Shady Nook Mixture

The cost of this mixture is determined by the percentage of Roughstalk Meadow Grass (*Poa Trivialis*) and the high percentage of Illahee Creeping Fescue which represents 80% of this mixture. We are extremely proud of the performance of our Shady Nook Mixture which really grows in shade, and is also suitable for semi-shaded areas as well. It is a fine general purpose lawn mixture.

40%	Illahee Creeping Fescue	Germination 90%
40%	Roughstalk Meadow Grass	Germination 90%
20%	Fancy Red Top	Germination 90%
.15%	Weeds

25 lbs. \$25.50; 100 lbs. \$100.00.		

Wild White Clover

A comparatively recent introduction of this strain of Clover. It is very vigorous and of a thick, dwarf growth. An important feature is its lack of flowers which is a great advantage in maintaining a green lawn. Wild White Clover is more vigorous than any weed, and because of its all around excellence we recommend its use in the finest lawns, whereas in the past we have never recommended the use of ordinary Dutch White Clover except for specific purposes. One pound is sufficient for 800 square feet. Price: 1 lb., \$3.00; 5 lbs., \$14.00.

Outstanding Bulb Developments for 1947

Outstanding in our trials for the past season were the lovely Peony-Flowered Tulips, the new and more practical Parrot or Fantasy type Tulip and the outstanding new Botanical or Species Tulip.

The Double Late Tulips were very impressive because of their adaptability as a cut flower as well as a garden flower. A cut vase of these resembles nothing more than a gorgeous arrangement of Peonies. The new Parrots are notable for their strength, stiff stem and strong petal substance, making them also an ideal cut flower.

Botanical Tulips heretofore have been confined to the popular Clusiana, Kaufmanniana and Eichleri. There are now a whole series of brilliant flame colored Tulips that are earlier than Crocus, starting with Red Emperor and continuing with Princess and Fusilier.

Every garden should have at least one clump of the flaming Red Emperor.

PESTEX

A remarkable preparation that will positively repel all forms of moles, field mice and other rodents that are destructive to bulbs. 60c per lb.; 10 lbs., \$4.50, postpaid. 1 lb. sufficient for treatment of 200 bulbs. Absolutely harmless to plant life.

SEEDS AND BULBS

BULBS FOR HOME GROWING

The advantages and beauty of bulbs grown in the home during the long winter season have but recently been recommended.

In the past many flower lovers were content to grow Paper-White Narcissi and an occasional pot of Lily-of-the-Valley, never daring to attempt some of the lesser known but more alluring bulbous plants.

We offer for your consideration a list of bulbs that can be planted with every assurance of complete success in the home.

Amaryllis, Sequoia

Hybrids

Calla Lilies, White

Calla Lilies, Yellow

Freestias For bright rooms, and temperature not over 60 degrees.

French White Roman

Hyacinths

Lachenalia

Veltheimia

The above list can be regarded as almost fool proof, but we, of course, suggest that any of the other items appearing in our Indoor Bulb Section should be attempted, for with a modicum of care and understanding very satisfactory results can be obtained.

SCHLING'S FAMOUS PANSY PLANTS

Fall planting is most satisfactory in all regions. In the region of New York and further north, protection should be given the plants by either hilling the soil up to within an inch of the tip of the plants, or else providing a protective mulch of salt hay, leaves or other clean material.
